

**TABLE OF CONTENTS**

Preface		vii–viii
Preface	<i>C. R. Rao, Sat Gupta</i>	vii–viii
Chapter 1: Statistical Modeling		1–67
Introduction	<i>Ričardas Žitikis</i>	3–4
Stochastic Volatility Models with Application in Option Pricing	<i>H. Gong, A. Thavaneswaran, J. Singh</i>	5–21
Fast Bayesian Estimation for VARFIMA Processes with Stable Errors	<i>Jeffrey S. Pai, Nalini Ravishanker</i>	23–37
Statistical Inference for Non-linear Models involving Ordinary Differential Equations	<i>Sujit K Ghosh, Lovely Goyal</i>	39–54
Wavelet Frequency Domain Approach for Statistical Modeling of Rainfall Time-Series Data	<i>Himadri Ghosh, R. K. Paul, Prajneshu</i>	55–67
Chapter 2: Distribution Theory		69–147
Introduction	<i>Frank P. A. Coolen</i>	71–73
Expanding The Statistical Flowgraph Model Framework To Use Any Transition Distribution	<i>Richard L. Warr, Aparna V. Huzurbazar</i>	75–85
Product-Convolution of R-symmetric Unimodal Distributions: An Analogue of Wintner's Theorem	<i>Govind S. Mudholkar, Hongyue Wang</i>	87–95
		<i>Contd.</i>

Near-exact Distributions for Certain Likelihood Ratio Test Statistics	<i>Carlos A. Coelho, Barry C. Arnold, Filipe J. Marques</i>	97–111
Local Score Tests in Mixture Exponential Family with Fixed Mean	<i>A. K. Gupta, Yanhong Wu</i>	113–127
An Enhanced Model of a Two Player Singled Out Game	<i>Michal Johannis, Jan Rychtář</i>	129–147
Chapter 3: Design of Experiments		149–196
Introduction	<i>Viatcheslav B. Melas</i>	151–152
Testing is Confidence Estimation: Partition Multiple Testing	<i>D. T. Vöss</i>	153–163
Two-level Supersaturated Designs: A Review	<i>Basudev Kole, Jyoti Gangwani, V. K. Gupta, Rajender Parsad</i>	165–184
Some Constructions of Balanced Ternary Residual Treatment Effects Designs	<i>Manohar Aggarwal, Mithilesh Kumar Jha</i>	185–196
Chapter 4: Statistical Inference		197–293
Introduction	<i>J. C. W. Rayner</i>	199
On the Two-Sample Behrens-Fisher Problem for Functional Data	<i>Jin-Ting Zhang, Xuehua Liang, Shengning Xiao</i>	201–217
Nonparametric Estimation of Bivariate Distribution using Concomitants of Order Statistics	<i>P. G. Sankaran, Ashis SenGupta, V. N. Sreeja</i>	219–232
Multicriteria Prioritization and Partial Order in Environmental and Ecological Statistics	<i>Rainer Bruggemann, Ganapati P. Patil</i>	233–243
Change-Point Problems: Bibliography and Review	<i>Tze-San Lee</i>	245–264
		<i>Contd.</i>

An M-estimation-based Criterion for Simultaneous Change Point Analysis and Variable Selection in a Regression Problem	<i>C. R. Rao, Y. Wu, X. Shi</i>	265–293
Chapter 5: Applied Statistics		295–349
Introduction	<i>Jerry Reiter</i>	297–298
The Probability of an Out of Control Signal from Nelson's Supplementary Zig-Zag Test	<i>David Griffiths, Martin Bunder, Chandra Gulati, Takeo Onizawa</i>	299–305
Estimation of Statistical Measures of Income Similarity	<i>Madhuri S. Mulekar, Takeshi Fukasawa</i>	307–319
Variance Estimation in Two-stage Cluster Sampling under Imputation for Missing Data	<i>David Haziza, J. N. K. Rao</i>	321–338
Evaluating a New Risk Marker's Predictive Contribution in Survival Models	<i>M. Liu, A. S. Kapadia, C. J. Etzel</i>	339–349
