CONTENTS

T. Tanaka : A partially observable discrete time Markov decision process with a fractional discounted reward

R. Malhotra and A. Bansal : Identifying threshold values of an open source software using Receiver Operating Characteristics curve (ROC)

N. S. Murthy, S. S. Gowri and B. P. Rao : Full code rate complex orthogonal STBCs for multiple transmit antennas

M. Basu and M. Das : Coding theory on generalized Fibonacci $n$-step polynomials

R. Jain, K. Abekar and R. S. Dubey : Study of Bergman’s minimal blood glucose-insulin model by adomian decomposition method

Y. L. Wu, Y. H. Tao and C. J. Chang : A comparative review on privacy concerns and safety demands of closed-circuit television among Taiwan, Japan, and the United Kingdom

A. C. Yadav : On Frobenius groups of order $q(q − 1)$

Pankaj, Gunjan and M. Pruthi : Unit graphs and subgraphs of Symmetric, Quaternion and Heisenberg groups
