Journal of Interdisciplinary Mathematics
ISSN: 0972-0502 (Print), ISSN: 2169-012X (Online)
Vol. 28 (2025), No. 8, pp. 2891–2909
DOI : 10.47974/JIM-Index-Vol-28-2025

JOURNAL OF INTERDISCIPLINARY MATHEMATICS

Index of Volume 28 (2025)

Number 1, February

N. H. Hussein and G. S. Mohammad : Variational Bayes analysis of the normal-gamma-exponential prior 1–8

B. A. Hassan and M. W. Taha : Intensification using conjugate gradient for removing impulsive noise from images 9–18

H. N. Jabbar, A. A. Al-Arbo, Y. A. Laylani, H. M. Khudhur and B. A. Hassan : New conjugate gradient methods based on the modified secant condition 19–30

B. A. Hassan and A. W. Mohammed : Adjusting the BFGS update for quasi-Newton methods 31–41

F. D. Shyaa : Small approximately 2-absorbing submodules and modules 43–49

G. A. Al-Juaifri, W. K. Ghafil and A. Al-Haboobi : Variational iteration method for solving generalized complex Ginzburg-Landau equation 51–58

B. A. Hassan and A. W. Mohammed : Improving the BFGS update for solving unconstrained optimization problems 59–68

L. A. A. Jabar and A. Y. K. Mutawek : JD-paracompact space 69–75

B. K. Mihsin : New results for a subclass of analytic functions with integral operator appling differential subordination and superordination 77–87

B. K. Awaad and E. S. Bhaya : Degree of approximation by Fourier series in terms of the generalized modulus of smoothness 89–93

H. A. H. Hasan and A. S. Ahmed : Development of a new approach algorithm for ant colony optimization using Python program 95–105

© Taru Publications

B. K. Awaad and E. S. Bhaya : Trigonometric approximation of signals functions in Lipchitz spaces of order $q \in N$ 107–113

Y. A. Laylani, S. M. Abdullah and B. A. Hassan : An innovative secant technique for minima one variable problems 115–121

I. A. Jbain and S. Y. Hasan : Derivation of Cauchy dispersion relation dependent on temperature for silicon 123–130

H. A. Mkharrib, A. H. Kamil, T. N. Salem and T. H. Dahees : A new homotopy analysis method analytical for singular two-point BVP solving 131–138

G. S. Salman and K. M. M. Al-Abrahemee : Designing feed forward fully fuzzy neural network to solve fuzzy singular perturbed Volterra integro-differential equations 139–146

A. I. Mohammed and B. J. Al-Asadi : High order of p-self-semi-homogeneous system of difference equations of dimension three 147–160

Y. A. Laylani and B. A. Hassan : A modern secant-kind technique with quadratic of convergence 161–167

I. J. Kadhim and A. A. Yasir : On higher prolongation and prolongational limit sets for random dynamical systems 169–181

A. S. Alfayhan and N. B. Hasan : Gas sensor for NH_3 and NO_2 gases : Analyzing optical dielectric constants in real and imaginary domains 183–193

S. H. Theyab : Solution of the delay differential equations via applying Rohit transform technique 195–201

N. I. Aziz and S. I. Aziz : Micro-generalized regular-minimal closed sets in micro-topological spaces 203–209

A. M. Jafar, Z. R. Zainy and A. F. Hassan : Separation axioms of ING-induced topology from TRI-topological space on simple graph 211–221

A. I. Mohammed and B. J. Al-Asadi : On p-self semi homogeneous system of difference equations of dimension two 223–234

B. A. Hassan and M. W. Taha : Modifying conjugate gradient methods for removing impulse noise images 235–244

H. N. Jabbar, Y. J. Subhi, H. N. Hussein and B. A. Hassan : Solving single variable functions using a new secant method 245–251

A. R. Hassan, H. I. Neamah and K. Sh. Al'Dzhabri : New closure operators associated with digraphs 253–260

H. S. A. Hamd, A. S. Hameed and N. I. Aziz : Inside of nano topological spaces : A novel generalized open and closed nano operator 261–266

N. Alkhattaf, M. H. Mohd and S. Supramaniam : Bi-univalent functions associated with Gegenbauer polynomials : New subclasses and coefficient properties 267–279

A. R. Hassan : Building a mathematical model of epidemics using differential equations 281–289

A. M. Jasim, Y. J. Subhi and B. A. Hassan : On new secant-method for minimum functions of one variable 291–296

Z. M. Najm, R. h. Obaid and A. A. Harbi : Solutions convergence of the Schrödinger equation in perdynamic model 297–301

E. A. Sfook and L. A. AL-Swidi : Phantom set in grill topological spaces and illumination of their properties 303–309

M. H. Geem, A. R. Hassan and H. I. Neamah : 0-Semigroup of g-transformation 311–316

H. Madlool and K. A. Kadhim : A new alpha power survival transformation distribution with an application for Weibull distribution 317–326

R. H. Hilal, N. A. M. Al-Karamy and S. M. Aljassas : Derivation of a numerical method for calculating single integrals 327–338

I. Z. Mushtt, J. A. Jasim and H. M. Mohi : Double INEM-transform integral for solving second order partial differential equation 339–346

B. A. Hassan and Y. A. Mohammed : Innovative conjugate gradient methods for image impulse noise removal 347–353

B. K. Mihsin : Several properties on strong differential subordination and superordination attached new generalized operator for analytic functions 355–362

B. A. Hassan and M. M. Mohammed : A new optimal Dai-Liao algorithm for solving iteration problems 363–368

Number 2, March

B. Aloraini, S. Khalil, M. N. Qureshi and S. Gupta : Variance estimation using an optional randomized response technique 369–380

P. Julatha, T. Gaketem, P. Khamrot, R. Prasertpong and A. Iampan : Sup-hesitant fuzzy UP-algebras 381–406

N. Malhotra, B. Bansal and S. Vashistha : Coincidence point theorems for new type of contractions in a G-metric space 407–416

Z. Chongyun and J. Guanghao : Fuzzy strongly countable semicontinuous lattices 417–424

M. Pakdemirli : Perturbation-iteration method applied to partial differential equations 425–439

M. Janthawee and N. R. Kanasri : Non-archimedean SEL Egyptian fraction expansion and characterizations of rational elements of function fields 441–456

G. M. Addis, T. G. Alemayehu, W. Z. Norahun, D. K. Boku and T. G. Beyene : Kernel ideals and co-Kernel dual ideals in the variety of MS-almost distributive lattices 457–471

Z. Bekkouche, H. Yfrah and Z. Dahmani : A study of coupled fractional differential system with nonlocal integral conditions : Existence and uniqueness, Ulam-Hyers stabilty 473–484

K. R. Karthikeyan and G. Murugusundaramoorthy : Pseudo starlike functions involving convex combination of two starlike functions 485–497

S. Javame, J. R. Tousi and M. Ghods : Investigating new Revan indices on V-Phenylenic nanotube and nanotori with M-polynomial approach 499–520

N. Nasri, B. Meftah and A. Lakhdari : Left-Radau-type inequalities via multiplicative s-convexity 521–541

R. S. Dhar : Unicity of meromorphic functions concerning its differential-difference operators 543–555

W. F. Al-Omeri and Saeid Jafari : Pre-Hurewicz spaces 557–575

V. Kamalakannan, M. Kavitha and P. Murugadas : Applications of picture fuzzy matrix in medical diagnosis 577–586

A. Nain, S. Kumar, N. Gaur, A. K. Phogat, A. Rani and G. M. Upadhyay : Mathematical modelling of time until anxiety reduced through Sahaj Yoga meditation 587–596

A. Nain, G. M. Upadhyay, N. Bohra, P. K. Soni and L. Raja : A mathematical approach to model signal variation in an aquatic robot's environmental sensor using heavy-tailed distributions 597–606

M. Kurisappan and S. S. Pandiyan : Decoding math : A review of datasets shaping AI-driven mathematical reasoning 607–625

A. Vashist, A. Joshi, S. Tiwari, R. Sharma, T. Jain and P. Dadheech : Graph theory based mathematical methods for improved explainable AI 627–636

T. Jain, A. Joshi, A. Keswani and P. Dadheech : Mathematics driven methods with fractional calculus and topological data analysis in image segmentation 637–646

T. Gopalakrishnan, H. Z. Almngoshi, V. K. Koppula, K. Dinesh, V. K. Sonthi, S. Sengan and P. Dadheech : Fractal image compression using digital cone metric space 647–658

S. Siddamsetti : Wireless sensor networks with modular metric spaces 659–667

S. Ahmad, S. Kumar and N. Ahmad : Approximate solution of nonlinear coupled boundary value problem related to blood flow in artery using variational iteration method 669–676

G. M. Abd-Elhamed and A. A. Azzam : Fixed points in generalized Alfa-Beta-FG contractions in b-metric spaces **677–689**

Number 3-A, April

J. M. Jamil, H. A. A. Ameer and I. E. Ubaid : A fuzzy *SWT*-open in double fuzzy topological space 691–701

A. H. Jasim : Focus on the solutions of the delay differential equations 703–708

J. A. A. Resen and A. K. Hassan : Approximation by modified Szasz-Mirakjans operators based on continuously infinitely differentiable function 709–719

S. D. Mohsen and L. J. Barghooth : A modification on some adjointable normal power operators 721–728

M. S. Ramadhan and K. K. Jassim : Impact of inclined magnetic field and rotation on peristaltic flow of viscoelastic fluid with variable viscosity 729–740

N. S. Taresh and S. S. Abed : An approximating solution of the hierarchical fixed-point problem 741–753

H. A. A. Mohammed, Z. S. Ktran and B. S. M. Ali : Feasible and optimal solutions for linear programming in modulo n space 755–762

H. S. Habib and M. A. K. Shiker : A combined (CG) method to solve nonlinear systems of equations 763–769

A. E. Hashoosh : A new form of hemivariational inequality system and its possible solutions 771–779

Z. Q. Ghazi and Z. D. Al-Nafie : Results on metrizable bornological algebra 781–785

A. G. Jasim, I. Harbi and A. S. Mohammed : On coupled fixed point theorem in partially fuzzy Fréchet space 787–793

M. G. Mohsin and Z. D. Al-Nafie : Linearity of differentiable mappings of locally convex algebras 795–800

S. Y. Al-Mayyahi and K. A. Jassim : Some geometrical characteristics of a class involving analytic functions of third derivative 801–806

H. F. Abbas and I. S. Ahmed : Pre measure defined on O–ring and some related concepts 807–812

Z. M. Joudha and S. N. A. Al-Azzawi : Competing dynamics : Analysis of different orders fractional epidemic model 813–822

B. Albuohimad : Exact solution of some fractional integral differential equations by using S-transform 823–830

A. M. Mohammed and H. O. Altaie : Analytical solutions for solving Riccati differential equation with fractional using Elzaki transform decomposition method 831–836

R. A. Al-Saphory, A. H. Maran and A. R. S. Juma : Certain subclass of meromorphic functions with positive coefficients defined by new operator 837–845

A. A. Alsaadi and I. Ellouze : A novel technique for solving the fractional Phi-four formula 847–858

S. M. Khalil and K. A. Jassim : New class of normalized multivalent harmonic functions 859–864

A. F. Talak, M. I. Hameed and A. K. Yaqoob : Study of certain subclasses of holomorphic functions for quasi-subordination 865–871

L. H. Al-Taee, A. A. M. Fawze and N. L. Housen : On a certain Volterra-Fredholm integral equation 873–879

A. K. Lafta and Y. Y. Yousif : Fibrewise minimal and maximal regular spaces and fibrewise minimal and maximal normal spaces 881–888

H. H. Luaibi : A fixed point of new weakly contractive maps 889–897

Z. S. M. Alhaidary and A. K. Faraj : (μ,δ)-reverse derivations with Γ-rings 899–908

R. H. Jasim, R. B.Yaseen and A. A. Shihab : Bi-nano topological spaces with grill bi-open sets 909–915

D. A. Abood, H. O. Muslim and A. S. Fakhir : Using the Kamal decomposition method for solving nonlinear partial differential equations 917–922

S. M. Jaber and M. Y. Mohsin : On soft T-continuous mapping 923–928

M. M. Mansoor and I. M. Talb : Some types of the shadowing property of uniform convergence 929–935

F. S. S. Awad : Competing dynamics : Soft intense set in soft ideal topological spaces 937–943

F. N. Hammad and M. I. Hameed : Certain meromorphic functions with the convolution operator 945–951

R. Almohammed, A. Y. K. Mutawek and L. A. Al-Swidi : New types of compact proximity 953–961

A. H. Zaboon, R. F. Hasan and A. H. Alwna : On approximation of functions by means of Weierstrass theorem 963–970

A. R. Sadek and E. A. Ghaloob : On $\hbar$ - supra open sets in supra topological spaces 971–981

F. J. Obaid and A. R. Sadek : Some types of fan sets in supra topology 983–989

Number 3-B, April

E. Y. Habeeb, N. D. Abbas and D. A. Kadhim : Some basic characteristic of center bi-topological space (*CBTS*) 991–1001

H. S. A. H. Al-Ali, N. M. Al-Shamary, M. A. M. Saeed, M. A. Aliwi and Y. K. Al-Talkany : Study on weakly Lambda ideal map 1003–1010

L. J. Barghooth, Z. A. Khudhair and E. A. Kuffi : Operational calculus of the expanded SEE transform technique 1011–1019

Z. H. Abood, M. K. A. Al-Rahem and D. A. Kadhim : Fixed point theorem over orthogonal vector metric space and application for solving integral equation 1021–1030

N. S. Hasan and A. Al-Fayadh : A semi-analytical approach for solving time-fractional nonlinear KdV equations using fractional multiple transformed iterative method 1031–1041

N. H. Shehab and A. R. S. Juma : On the fourth Hankel determinant introduced by using a new subclass 1043–1057

I. M. Jawad and Z. D. AL-Nafie : ℕ_b- paracompactness in nano topological spaces 1059–1064

F. A. Mohommed, Z. D. Ridha and S. Y. Alkufi : Application of the Shehu transform in science and technology 1065–1072

N. A. Laabi and A. Al-Sabti : Stabilizability of non-linear dynamic control systems on time scales in Banach spaces 1073–1079

T. H. Majeed : Topological free group-groupoids 1081–1088

A. J. Mohammad and I. J. Mohammad : Neural network operators of multivariate of Bernstein-type with the integer positive parameter 1089–1095

S. Y. Al-Mayyahi and K. A. Jassim : Present study on fourth order differential subordination associated with differential operator 1097–1108

B. J. Tawfeeq and S. H. Jasem : $\acute{P}$-compact and $\acute{P}$-closed spaces and some of its properties 1109–1116

M. H. Hadi and L. A. A. Jabar : Build new operator using cluster system 1117–1124

Z. T. Abdulqader, N. E. Arif and R. B. Esmaeel : $\mathcal{J}_X - \mathcal{L}$ – open and some of their generalizations 1125–1130

L. S. Abdalbaqi, H. H. Ebrahim and A. Al-Fayadh : Study of d-interior and d-closure 1131–1136

H. O. Altaie, B. N. Shihab and A. R. A. Ali : Modified adomian decomposition method for solving PDEs of fractional order 1137–1143

M. J. Raheem and B. K. Abbas : Proposing an effective numerical algorithm based on analysis to solve two-dimensional Friedholm equations 1145–1154

H. O. Altaie, A. R. A. Ali and B. N. Shihab : Analytical solutions for nonlinear differential equations via differential transform technique 1155–1159

A. Al-Abayechi, H. Al-Janabi and H. K. H. Alkhayyat : New results in fuzzy soft bitopological spaces via (1,2)-fuzzy soft pre-open sets 1161–1172

M. K. Kareem and L. A. A. Jabar : ∫-focal nested set 1173–1183

S. D. Mohsen and Ihsan A. Awadh : An innovation analytical application of the proposed system of equations on Hilbert space 1185–1196

M. A. Ahmed, I. Ellouze and S. D. Mohsen : A new general model version of quasinormal operator based on a fuzzy soft Hilbert domain 1197–1206

S. D. Mohsen and M. J Mohammed : A specific subfamily of paranormality associated with even power underlies the fuzzy soft principle 1207–1215

L. J. Barghooth, A. Taghavi and S. D. Mohsen : Investigating the attributes for a novel type of extended soft quasinormal for normal operator in Hilbert space 1217–1224

S. M. Ghadeer and Z. H. Maibed : Weak convergence theorems of new type 4-steps iterative techniques 1225–1232

J. S. Oleiwi and T. H. Majeed : Certain types of topological groupoids 1233–1237

J. M. Shakir and Z. H. Maibed : Convergence and best proximity point theorems via tripled $G_{P_{\S}}$-mappings 1239–1245

K. A. Hussain, H. K. Khudhair and M. A. Sarhan : A new embedded improved Runge-Kutta approach to solve first order ordinary differential equation 1247–1254

M. D. Jasim, A. S. Abduljabbar and N. M. Dahash : Finding a new parallel method of harmonic Runge-Kutta mean by using predictor corrector form 1255–1262

Z. E. Abdulnaby and W. B. Jubair : Certain properties of analytic fractional functions on the open unit disk 1263–1268

M. A. Mohammed and L. N. M. Tawfiq : New accurate method for solving fourth order two-dimension evolution equations 1269–1276

M. Waleed and R. B. Esmaeel : New weak open set in soft topological space with an ideal 1277–1289

A. A. Abdulrazak and H. J. Ali : New patterns about supra MC function 1291–1296

H. O. Altaie and A. R. A. Ali : Solutions of special types of nonlinear differential equations with fractional order 1297–1301

Z. A. Hussein and A. F. Jaddoa : Qualitative property to type of neutral differential equation 1303–1308

H. M. Salih and G. H. Auda : Some results about (Micro) topological spaces 1309–1314

Number 4, June

R. Rasuli : Intuitionistic fuzzy (bifuzzy) BCK-algebras under norms 1315–1334

O. Benhamida and Z. Dahmani : New type of fractional Langevin equations of sequential derivatives **1335–1354**

A. Anber, Z. Dahmani and I. Jebril : Two classes of conformable fractional evolution problems solved by the U-EM method **1355–1365**

O. Diop and A. Ndiaye : Geometry of hypersurfaces in Euclidean 4-space with Caputo fractional derivatives **1367–1384**

A. K. Haydar, R. A. Zaboon and S. S. Alhily : Solving n^{th} order non-homogenous complex partial differential equation using two dimensional differential transform method **1385–1396**

J. Nagrebetskaya and V. Panov : Integer invariants of joint action of Boolean variables and their properties **1397–1416**

A. D. Jauhari, A. Munjal and S. Kumar : Absolute linear method of summation with weighted mean **1417–1428**

H. M. Hubal : Mathematical investigation of change in the size of a cancerous tumour when its cells are being destroyed by T-lymphocytes **1429–1435**

F. Bensaid and M. Saadi : Some necessary conditions for functional calculus in Besov-type spaces **1437–1451**

M. Mabotsa and J. M. W. Munganga : Mathematical modelling of the spread of Nipah virus in bats, humans and pigs **1453–1488**

M. H. Darassi, O. Yasin and M. Ahmed : A semi-analytical method to solve the Fitzhugh-Nagumo equation **1489–1504**

P. Amsellem and S. Gul : Planning a dynamical movement of patterns based on groups relations **1505–1516**

S. Kadyrov, N. Shynarbek and A. Orynbassar : On the solutions of second order difference equations with variable coefficients **1517–1527**

R. Azennar, S. Asbab and K. El Hajioui : On fractional derivation and fractional convexity **1529–1536**

L. S. C. de Sá, A. R. L. de Oliveira and E. V. P. Spreafico : Power of Leslie matrices : Diagonalization and finite differences methods **1537–1551**

Inderjeet and R. Bhardwaj : An integrated approach of the numerical simulation of nonlinear equations by modified bisection and Regula Falsi method **1553–1571**

C. M. Da Fonseca and A. G. Shannon : Telephone numbers extensions **1573–1580**

B. Nurwahyu, M. Nur, N. Aris, J. Massalesse and M. Zakir : Common fixed point theorems in the function weighted b-metric spaces and their application **1581–1594**

K. Rustemova, A. Imanbaeva, S. Akhmetova and A. Kopzhassarova : Solvability and factorization of mixed problem for the heat conduction equation **1595–1605**

N. Preethi and G. K. Revathi : A view on Pythagorean fuzzy digital feeble topological spaces, nets and prefilters **1607–1622**

A. Jose, N. M. M. Namboothiri and J. Thomas : Rings of continuous linear transformations on a topological vector space **1623–1634**

I. H. Halil, Y. J. Subhi and B. A. Hassan : Impact to formula gradient impulse noise reduction from images 1635–1642

Z. F. Hassan and K. T. R. Aljamaly : The convex and strictly convex **on graphs** **1643–1647**

M. A. Kadhim, S. T. A. Alshibley, A. M. Abed and S. M. Kadham : Solution of Volterra fuzzy integral equations by using double fuzzy Aboodh transform 1649–1655

R. H. Obaid, A. A. Harbi and Z. M. Najm : Compact operator of peridy**n**amic model 1657–1661

Z. Alhadawiaa and A. Al-Abayechib : New result of **s**oft topological space 1663–1671

A. Y. K. Mutawek, R. Al-Mohammed and Luay A. Al-Swidi : Characteri**z**ations of IIS-Compactness space 1673–1679

W. A. said and S. M. Kadham : A novel transform **t**echnique in edges detection of cancer cells 1681–1687

Y. Mahajan and H. Naga**r** : Riemann-Liouville fractional operator on S-function 1689–1694

S. Sharma and H. Nagar : **Complex Sadik integral transform of Bessel's function of first kind** **1695–1701**

Number 5, August

C. Chanmanee, R. Chinram, R. Prasertpong, P. Julatha and A. Iampan : Type 2 of internal direct products of UP (BCC)-algebras 1703–1722

R. D. Mohanraj and C. Rajesh : Fixed point results using self mapping in multiplicative metric space **1723–1734**

H. F. Nisa, S. Khalil and S. Gupta : Improved mean estimation of sensitive study variable under two phase sampling with sub-sampling the non-respondents **1735–1758**

A. Benaissa, F. Bouazzaoui, A. Salim and M. Benchohra : A random S-asymptotically δ_1-periodic mild solutions for functional evolution equations with delay and random effect 1759–1777

M. Hasani and M. Ghods : Investigating fuzzy topological indices of linear and multi-cyclic Naphtalene 1779–1793

J. V. Shaalini and F. S. Emmanuel : A proposed improved ratio method for the solution of IVPs in delay differential equations of various characteristics 1795–1806

S. Asbab, R. Azennar and K. El-Hajioui : Fractional derivative and the inverse function theorem 1807–1812

C. Carlos, R. Neelamegarajan, R. Ennis and S. José : Almost (K, L)-continuous functions in ideal bitopological spaces 1813–1824

M. F. Mothebe, D. N. Kagiso and B. T. Modise : A proof of cases of de Polignac's conjecture 1825–1835

Inderjeet and R. Bhardwaj : Numerical simulation of nonlinear equations by converting quadrature rule to iterative technique 1837–1845

J. Balamurugan and C. Rajesh : Exploring fixed points in b-metric spaces using weakly contractive mappings 1847–1857

C. Chanmanee, R. Chinram, P. Khamrot, P. Julatha and A. Iampan : External direct products of BG-algebras 1859–1870

N. Racshitha and R. Manimaran : Solving stochastic delay differential equation by using Runge-Kutta method and method of lines 1871–1879

T. Stalin, S. Thalapathiraj, A. B. Manoj and R. Balakumar : Certain subclasses of bi-univalent functions connected with polylogarithm function 1881–1891

K. Hemavathy and S. Thalapathiraj : Integral-type contractions and weakly compatible mappings in 2-metric spaces 1893–1899

S. M. Stefanov : On the discrete and continuous Markov processes 1901–1908

I. R. Sumathi, A. Kurian, V. D. Tharsini and O. Al-Shanqiti : An efficient algorithm by employing neutrosophic Weber hybrid aggregation operators in decision-making analysis 1909–1930

M. Benallia and M. Dilmi : A new regularity criterion for the 3D-Boussinesq equations in homogeneous Besov and Triebel-Lizorkin spaces 1931–1939

K. Tulenbayev, G. Karybayeva and A. Zhadyranova : On the existence of solutions of boundary value problems for quasilinear elliptic equations of general form in Sobolev spaces 1941–1954

J. Josen, S. J. John and J. Vallikkavungal : Categorical accommodation of various notions in generalized multidimensional fuzzy sets 1955–1971

K. Thongtha and N. Pochai : A mathematical model of water pollution measurement in a stream using a collocation method with a higher order Legendre polynomial 1973–1980

A. M. Hussein : Using triple maximal absolute young function determined by paranormed triple sequence spaces 1981–1988

Z. Faiz, J. Pan and H. Benaissa : Numerical analysis for a variational/hemivariational type inequalities of Bingham fluids 1989–1998

S. Y. Alkufi, O. A. H. Al-Gburi and H. J. Mehdi : Using FPV-transforms to solve a system of PDEs 1999–2003

S. Luengaksorn and R. Chinram : Solutions of the Diophantine equation $n^x + (7p)^y = z^2$ 2005–2010

M. Mamatov, N. Karimov, S. Muminov and S. Sharipova : Numerical solution algorithm for the model of combat operations under the influence of time delay 2011–2023

I. Ayoob : Geometric progression of length four on the circle 2025–2030

K. Thongtha and N. Pochai : A simple mathematical model for assessing water quality in a closed-system shrimp farm 2031–2043

P. Kittisuwan, C. Siwapornanan and P. Akkaraekthalin : Solving linear inverse problem via mixture regularization 2045–2057

Number 6, September

A. Kumar, K. M. Bhagat, P. Dadheech, S. R. Dogiwal and R. Sharma : Manifold learning and differential geometry for disease detection and risk prediction 2059–2069

R. Sharma and C. S. Lamba : A structured mathematical approach to improving gastrointestinal disease classification with transfer learning 2071–2078

R. Gangarde, A. Julian, M. S. M. Dhar, G. I. Mary, M. Rele and M. Vaithianathan : Applications of partial differential equations and Green's functions in climate change modeling 2079–2088

A. B. Rajmane, S. B. Patil, V. G. Kale, S. V. Joshi, T. N. Pawase and D. B. Patil : Mathematical models for cognitive systems using differential geometry and reinforcement learning 2089–2097

C. A. Kumar, C. K. Narayanappa, S. Bhargavi, S. Harish, R. Krishna, K. R. Varalakshmi and S. Ashwini : Nonlinear dynamics and chaos theory in engineering with applications in control systems and signal analysis 2099–2108

W. Sripanya, W. Rungrottheera and P. Hyunsin : Fourier series analysis and computation based on function characteristics 2109–2120

V. S. Lakshmi, N. Srimannarayana, M. V. C. Rao, F. Ayant and D. K. P. Kumar : Eulerian integrals of I-function 2121–2130

C. Anitha, V. Bibhu, P. Ghutke, P. C. Shende, S. Harne and G. Sasikala : Nonlinear PDE models for deep learning architecture stability analysis 2131–2139

V. V. Mane, S. Deshpande, V. K. Gadpayle, G. Nagdeve, A. Ghaysundar and A. S. Kumar : Computational fluid dynamics using finite element methods for turbomachinery 2141–2149

M. Aniji, B. Prabhakar, A. Nair, P. Anerao, R. G. Biradar and M. P. Rao : Mathematical analysis of orbital mechanics with perturbation methods 2151–2159

V. V. Pangave, S. Singh, S. Redkar, S. Sawadatkar, R. Raikwar and S. Radhakrishnan : Integral equation methods in acoustic wave propogation for structural health monitoring 2161–2169

U. Bhardwaj, M. Renukhadevi, P. V. Meghare, G. Chavan, S. Ikhar and A. Suneetha : Stochastic differential equations in modeling gene regulatory networks 2171–2179

V. V. Mane, T. A. Wani, P. Ghutke, V. Patil, M. Kurulekar and G. M. Reddy : Nonlinear partial differential equations in quantum fluid dynamics 2181–2188

N. Shete, M. Patil, S. Thakur, R. Chadha, S. N. Ajani and G. Srujana : Lie group theory in symmetry reduction of physical systems 2189–2196

C. Mudimannan, G. Patil, S. Bhan, S. Bhise, B. K. Patil and J. Mounika : High-order finite difference schemes for hyperbolic conservation laws 2197–2205

S. Saoji, B. Prabhakar, M. John, K. Ingle, V. G. Raut and K. N. Prasad : Iterative Krylov subspace methods for large sparse linear systems 2207–2215

K. P. Reshma, S. Prasad, C. K. Sharma, A. Deshpande, S. B. Bagal and K. Tejaswi : High-accuracy Runge–Kutta methods for stiff ODE systems 2217–2225

M. Joshi, P. Gurav, T. A. Wani, G. Korwar, H. Barapatre and C. K. Veni : Monte Carlo and quasi-Monte Carlo methods for high-dimensional integration 2227–2235

M. H. Molawade, S. Desai, U. Kadam, S. V. Kumar, S. Vanjire and S. Kakad : Computational harmonic analysis for image compression 2237–2245

B. Sule, V. Bibhu, S. Kumar, S. Katoch, D. Kumar and L. K. Wani : Differential geometry approaches to curvature and shape analysis 2247–2253

S. Kulkarni, U. Kadam, D. K. Paswan, K. Shipra, B. C. Julme and S. L. Dhondge : Numerical stability analysis of nonlinear differential equations in engineering systems 2255–2261

K. T. Punj, T. Dhanadhya, T. A. Wani, S. S. Banait, R. P. Singh and S. L. Dhondge : Spectral methods for solving partial differential equations in multiphysics simulations 2263–2271

V. Kumar, U. Bhardwaj, Y. Sood, V. Bhanuse, V. Musale and M. R. Kumar : Mathematical modeling of drug delivery systems with diffusion and absorption equations 2273–2280

C. Deshpande, C. Ramtirthkar, T. A. Wani, V. K. Bhosale, M. Gulhane and K. S. Kumar : Topology and knot theory applications in quantum field theory 2281–2287

V. D. Gowda, P. Gite, H. M. Nethravathi, P. K. Lakineni, K. D. V. Prasad and S. Chitta : Mathematical models for noise reduction in IoT image processing applications 2289–2299

M. Khowal, L. Poonia, M. Vijayvargiya and R. Mathur : Inflationary scenario in Bianchi type V bulk viscous cosmological model in Saez Ballester theory 2301–2310

R. Mathur, L. Poonia, V. Maheshwari and M. Khowal : Inflationary scenario in Bianchi type VIII space time with bulk viscosity using flat potential in general relativity 2311–2318

M. Vijayvargiya, L. Poonia, M. Khowal and V. Maheshwari : Bianchi type-VI_0 string cosmological model in Saez Ballester theory with variable Λ 2319–2329

V. Maheshwari, L. Poonia, R. Mathur and M. Vijayvargiya : LRS Bianchi type II stiff fluid inflationary model with flat potential in general relativity 2331–2338

D. B. Lakshmikantha, N. Raveendra, D. V. Jayalakshamamma, M. C. Kemparaju and D. V. Chandrashekar : Solution of nonlinear differential equations for hybrid nanofluid flow over stretching/shrinking permeable sheets with heat generation and stability analysis 2339–2348

F. Shaikh, M. S. Pervez, S. S. Banait, S. Goswami, A. Kumar and U. C. Patkar : Algorithmic approaches to real and complex geometry in computer vision applications 2349–2357

H. K. B. Jadhav, D. Goyal, T. Singh, Y. Davda, S. K. Swarnkar and D. Dhabliya : Infinite-dimensional Hamiltonian systems in quantum computing simulations 2359–2366

K. Shipra, B. M. Hardas, P. Wawage, V. V. Giri, S. P. Gaikwad and N. Rakesh : Practical applications of random dynamical systems in autonomous vehicle navigation 2367–2375

Number 7, October

Z. A. Nema and A. H. Alwan : Co-intersection graph of subsemimodules of a semimodule 2377–2384

H. S. Fard and E. Dastranj : Exact and numerical solutions for two nonlinear regime switching models **2385–2398**

M. Al-Azaizeh and K. Al-Zoubi : On graded weakly quasi n-absorbing submodule **2399–2412**

S. T. Ejaz, S. Malik, A. Akgül and M. K. Hassani : Numerical investigation of second order one dimensional telegraph equation using subdivision schemes 2413–2437

J. Ettayb : Pseudospectra and condition pseudospectra of multivalued linear operators on non-Archimedean Banach spaces 2439–2457

K. Berrah, S. Manro, S. Beloul and R. Sharma : Applications of Pata-type common fixed point theorems in complex valued b-metric spaces 2459–2474

Z. Boumezbeur : The $\mathcal{L}^p_G(\Omega)$-continuity of solutions to neutral stochastic differential equations driven by G -Brownian motion 2475–2489

B. Yong, J. Hoseana and L. Owen : Combating new COVID-19 variants in Indonesia : Is accelerating four-dose vaccinations sufficient? 2491–2517

H. A. Agwa and M. Hamam : Oscillation of second-order nonlinear noncanonical differential equations with mixed type of argument 2519–2532

J. Hattab : Mixed multifractal dimensions of overlaps of self-similar sets and measures 2533–2553

A. Khalouta : New results of Khalouta transform method for non-constant coefficients ordinary differential equations 2555–2566

S. Y. Tchoumi, C. W. Chukwu, M. L. Diagne, H. Rwezaura and J. M. Tchuenche : Optimal control analysis of malaria and typhoid fever co-dynamics 2567–2600

Y. M. Alawaideh, B. Abu-Izneid, B. M. Al-Khamiseh and D. Baleanu : A fractional approach to Hamiltonian-generalized classical fields : The Hamilton-Jacob technique 2601–2612

S. A. H. Kadhim, S. A. H. Kadhim and M. Y. Abed : FS-convergent in norm (Fsc_n^1–Convergent) in a fuzzy normed riesz spaces 2613–2621

Z. Zahreddine : A novel approach to the Routh-Hurwitz criterion 2623–2630

Z. S. Ktran, A. A. Abbas and B. K. Awaad : Generalization of FFW-transform 2631–2637

G. Berikkhanova : Solution of an inhomogeneous biharmonic equation in a multi-connected domain 2639–2648

E. N. Sumadya, B. D. Handari, D. Aldila and B. Prihandono : Evaluating the consequences of quarantine non-compliance on disease spread and control 2649–2676

K. Dinesh, E. Sila, K. Zoto, B. Shoba and D. Rizk : A novel approach of digital parametric metric space 2677–2686

V. Shyamaladevi and G. K. Revathi : Separation axioms in q∗-rung orthopair neutrosophic topological spaces 2687–2706

J. J. M. Rabuni, R. M. Devi, S. Subhalakshmi and J. Sudha : Analysis of operation on spherical fuzzy soft topology and its application 2707–2732

Number 8, December

F. Hathat and A. Khalouta : Khalouta reduced differential transform method and its convergence for nonlinear fractional biological population equation under Caputo's fractional operator 2733–2750

G. El Montasser : COVID-19's daily new confirmed cases and deaths in Tunisia : A forensic analysis and machine learning algorithms for outlier detection **2751–2770**

T. Waezizadeh and M. R. Molaei : A new stochastic integral created for air pollution **2771–2779**

S. E. Fadugba, I. Ismail and M. Kekana : Traveling wave solutions to the class of nonlinear partial differential equations with a Riccati-Bernoulli sub-ODE method 2781–2794

A. Sharif and M. Ghojogh : A new plan to study various solutions of the extended Korteweg-de Vries(K-dV) equation with conformable derivative 2795–2814

T. Garg, M. Rakshit and Shyamsunder : A novel computational expansion of the fractional kinetic equation with incomplete H-functions 2815–2825

S. M. Stefanov : Scheduling theory and applications revisited 2827–2835

A. A. M. Malkawi, A. Rabaiah, W. Shatanawi and A. Talafhah : *MR*–Metric spaces with applications 2837–2865

Inderjeet and R. Bhardwaj : A new variant of secant technique for simulation of nonlinear equations 2867–2876

P. Gayathri and J. Uma : Generalized Hyer's-Ulam stability for the cubic functional equation in non-Archimedean normed spaces 2877–2890

Index of Volume 28 (2025) 2891–2909
