FOREWORD

In today's rapidly evolving landscape of technology and business, the synergy between Mathematics, Optimization Techniques, and Innovation has never been more critical than now. Mathematics is the backbone of many cutting-edge technologies, providing the theoretical foundation upon which optimization techniques can be applied to solve complex problems efficiently. From algorithmic trading in finance to supply chain management in logistics, the integration of mathematical principles and optimization methodologies is driving unprecedented advancements across various industries.

This Special Issue serves as a platform to showcase the latest research and developments in the field of Mathematics and Optimization Techniques as applied to Technology and Business. Researchers from diverse background have contributed their expertise to unravel new insights, algorithms, and applications that harness the power of mathematical modeling and optimization to address real-world challenges.

In the realm of technology, mathematical principles underpin innovations such as machine learning algorithms, network optimization, and cryptographic protocols, enabling the creation of smarter systems with enhanced efficiency and reliability. Similarly, in the realm of business, optimization techniques play a pivotal role in optimizing resource allocation, streamlining operations, and maximizing profits in dynamic and competitive environments.

The enthusiastic response from the research community was overwhelming during our 5th International Conference ICIMMI 2023, held on 14-16 December 2023 at Poornima Institute of Engineering & Technology, Jaipur with over 90 papers submitted to the track pertaining to the Special Issue. These papers underwent a rigorous peer review process to ensure the publication of high-quality and cutting-edge research. Out of the extensive submissions, 27 papers were selected for publication in this prestigious issue.

The guest editors express their heartfelt gratitude to all the authors who generously shared their valuable research with us. We are also grateful to our publication partner for supporting the realization of this esteemed Special Issue on "**Advancements in Mathematics and Optimization Techniques in Technology and Business**". Furthermore, we extend special thanks to Prof. B. K. Dass, Chief Editor, for his unwavering support and cooperation in bringing this initiative to fruition of selected peer reviewed, high quality papers in *Journal of Statistics and Management Systems* published by Taru Publications, New Delhi.

Special Issue on

Advancements in Mathematics and Optimization Techniques in Technology and Business

CONTENTS

J. S. Sawale, P. V. Barekar, J. M. Gandhi, S. N. Gujar, S. Limkar and S. N. Ajani
Deep learning for image-based diagnosis : Applications in medical imaging for drug development 201–212

D. Bhoyar, S. Jain, J. D. Kene, Y. A. Suryawanshi, A. R. B. Patil and S. J. Karale
Enhancing agriculture productivity with machine learning in crop yield optimization 213–223

V. S. Ghorpade, P. A. Jadhav, R. S. Jadhav, S. N. Gujar, W. V. Ashok and S. V. Pandit
Exploring explainable AI in pharmaceutical decision-making : Bridging the gap between black box models and clinical insights 225–236

S. J. Karale, N. Mangrulkar, S. S. Badhiye, A. R. B. Patil, D. Bhoyar and R. Khobragade
Performance evaluation of machine learning algorithms for Parkinson's disease identification model 237–247

A. A. Patil, V. Niranjane, S. B. Dhadde, A. Kumar, S. Borde and P. Chandre
Predictive analytics for patient adherence : A machine learning approach in medication management 249–260

S. R. Pidurkar and S. Raut
Several implications for forecasting a brain attack utilizing mathematical techniques 261–271

J. Arora, S. Rathee, M. Gahlan, A. Yadav and Shalu
Diabetes prediction using feature engineering and machine learning algorithms with security 273–284

T. H. Khan and S. Ridhorkar
A pragmatic analysis of text-based sentiment analysis models from an analytical perspective 285–294

P. Golar and R. Sharma
A secured image based three factor user authentication system 295–302

P. V. Barekar and K. R. Singh
Analysis of different noise filtering techniques for object detection and tracking from video with varying illumination 303–313

B. M. Hardas, M. G. Aush and V. Raut
Data-driven optimization strategies for enhanced cardiovascular risk assessment 315–325

U. Thakur, R. Thakur, S. Somkuwar, A. Shendare, R. Ingole, A. Verma and S. Tidke
Efficient object tracking through machine learning and optimization strategies in computer vision 327–336

G. Dhopavkar, M. Takalikar and M. Kshirsagar
Enhancing word sense disambiguation through contextual embedding and optimization techniques 337–347

N. Balani, M. Mulchandani, S. Vaswani, S. Tiwari, K. Gidwani, M. Nagwani and K. Nagdeve
IoT-driven sprinklers : Revolutionizing landscape optimization through smart watering solutions system 349–357

R. A. Wakode and S. W. Mohod
MIDGNWD : Design of an efficient multimodal iterative deep graph network wearable interface for detecting drowsy drivers 359–368

S. S. Thombre, L. Malik and S. Kumar
MXRFCS : Development of an enhanced multidomain X-ray feature representation model for the detection and classification of COVID severity levels 369–382

A. A. Koparde, P. A. Jadhav, G. J. Annie, D. Goyal, B. M. Hardas and P. Mange
Natural language processing for drug information extraction : Advancing knowledge discovery in biomedical literature 383–393

S. Raut, S. Bhura, J. Khushalani, H. Kim, N. Ramani, R. Bajaj and D. Jeswani
Revolutionizing construction engineering education : A virtual reality approach for enhanced training and optimization 395–403

N. R. Jadhav, S. Bhutada, S. R. Sagavkar, R. Pawar, A. B. Kanwade and P. Mange
AI-driven pharmaceutical manufacturing : Revolutionizing quality control and process optimization 405–416

A. S. Shete, S. Bhutada, M. B. Patil, P. H. Sen, N. Jain and P. Khobragade
Blockchain technology in pharmaceutical supply chain : Ensuring transparency, traceability, and security 417–428

B. K. Panda, P. B. Niranjane, D. P. Mali, P. A. Bainalwar, U. B. Aher and S. Bhattacharya
Pharmacovigilance in the digital era : A machine learning approach for early detection of adverse drug reactions 429–440

L. M. S. Akoosh, F. Siddiqui, S. Zafar, S. Naaz and M. A. Alam
An experiment-based investigation into machine learning for predicting coronary heart disease 441–453

M. Banday, S. Zafar, P. Agarwal and M. A. Alam
Diabetes prediction using machine learning classifiers with oversampling and feature augmentation 455–464

P. R. Naidu, P. Gite, V. Deka, K. D. V. Prasad, V. D. Gowda and M. Rahman
Mathematical enhancement of unsupervised machine learning algorithms for optimal lifeline donor knowledge extraction 465–477

D. Sharma and R. Goyal
A review on unveiling the impact of government policies on Rajasthan's startup ecosystem 479–488

A. K. Tiwari and S. Yadav
Algorithmic model for cloud performance optimization using connection pooling technique 489–499

Dibyanshu and R. K. S. Rajput
Exploring agricultural image data through deep learning for visual information analysis : A study on Cabbage (Brassica Oleracea var. Capitata) farming 501–513
