

**JOURNAL OF
STATISTICS & MANAGEMENT SYSTEMS**

Index of Volume 27 (2024)

Number 1, January

Y. P. TENG AND L. Z. LAN : Investor sentiment at the initial stage of public emergency : Evidence from Shanghai stock market	1–8
S. SHAH, P. J. HAZARIKA, S. CHAKRABORTY AND G. G. HAMEDANI : A generalization of Balakrishnan-alpha-skew-normal distribution : Properties, characterisations and applications	9–33
A. O. ADESINA, S. A. AJAGBE, A. NAYYAR AND J. A. AWOKOLA : Technology acceptance and users' satisfactions with telecommunication services	35–57
A. SHARMA AND U. GHOSE : Deep learning based bi-polar sentiment classification of movie reviews in Hindi	59–86
S. SINGH, A. KUMAR, S. HOTA, S. DUTTA AND F. STYANINGRUM : Exploring the factors in shaping investor's financial decision-making	87–103
S. PATTNAIK, S. L. HOTA, A. KUMAR, A. R. HOTA AND P. KIRAN : Awakening deep emotional needs of consumers based on big data and emotional analysis	105–119
R. LATA AND U. SOLANKI : Impact of financial factors on economic growth : Evidence from India	121–131
F. ZEHRA, F. S. KHAN AND S. S. MAZHAR : Scanning the surging Indian digital payment gateways through peer-to-peer (P2P) applications and challenges : A literature review	133–154
P. PUJARI, M. ARORA, A. KUMAR AND A. PANDEY : Understanding factors influencing technical inertia in family-run SMEs : A study on technology adoption challenges	155–168
R. FELICITA, T. SHIRMILA AND W. K. WIDODASIH : Fabric sustainability : An eco-conscious perspective of Indian consumers	169–186

- J. SAHOO, HERLINA, M. KHURSID, D. MISHRA, A. KUMAR AND
J. SAHOO : Fuelling the future : A comparative exploration
of energy prices in India and the US 187–200

Number 2, March

- J. S. SAWALE, P. V. BAREKAR, J. M. GANDHI, S. N. GUJAR,
S. LIMKAR AND S. N. AJANI : Deep learning for image-based
diagnosis : Applications in medical imaging for drug
development 201–212
- D. BHOYAR, S. JAIN, J. D. KENE, Y. A. SURYAWANSHI,
A. R. B. PATIL AND S. J. KARALE : Enhancing agriculture
productivity with machine learning in crop yield
optimization 213–223
- V. S. GHORPADE, P. A. JADHAV, R. S. JADHAV, S. N. GUJAR,
W. V. ASHOK AND S. V. PANDIT : Exploring explainable AI
in pharmaceutical decision-making : Bridging the gap
between black box models and clinical insights 225–236
- S. J. KARALE, N. MANGRULKAR, S. S. BADHIYE, A. R. B. PATIL,
D. BHOYAR AND R. KHOBRAGADE : Performance evaluation
of machine learning algorithms for Parkinson's disease
identification model 237–247
- A. A. PATIL, V. NIRANJANE, S. B. DHADDE, A. KUMAR,
S. BORDE AND P. CHANDRE : Predictive analytics for patient
adherence : A machine learning approach in medication
management 249–260
- S. R. PIDURKAR AND S. RAUT : Several implications
for forecasting a brain attack utilizing mathematical
techniques 261–271
- J. ARORA, S. RATHEE, M. GAHLAN, A. YADAV AND SHALU :
Diabetes prediction using feature engineering and machine
learning algorithms with security 273–284
- T. H. KHAN AND S. RIDHORKAR : A pragmatic analysis of
text-based sentiment analysis models from an analytical
perspective 285–294
- P. GOLAR AND R. SHARMA : A secured image based three
factor user authentication system 295–302
- P. V. BAREKAR AND K. R. SINGH : Analysis of different noise
filtering techniques for object detection and tracking from
video with varying illumination 303–313

B. M. HARDAS, M. G. AUSH AND V. RAUT : Data-driven optimization strategies for enhanced cardiovascular risk assessment	315–325
U. THAKUR, R. THAKUR, S. SOMKUWAR, A. SHENDARE, R. INGOLE, A. VERMA AND S. TIDKE : Efficient object tracking through machine learning and optimization strategies in computer vision	327–336
G. DHOPAVKAR, M. TAKALIKAR AND M. KSHIRSAGAR : Enhancing word sense disambiguation through contextual embedding and optimization techniques	337–347
N. BALANI, M. MULCHANDANI, S. VASWANI, S. TIWARI, K. GIDWANI, M. NAGWANI AND K. NAGDEVE : IoT-driven sprinklers : Revolutionizing landscape optimization through smart watering solutions system	349–357
R. A. WAKODE AND S. W. MOHOD : MIDGNWD : Design of an efficient multimodal iterative deep graph network wearable interface for detecting drowsy drivers	359–368
S. S. THOMBRE, L. MALIK AND S. KUMAR : MXRFCS : Development of an enhanced multidomain X-ray feature representation model for the detection and classification of COVID severity levels	369–382
A. A. KOPARDE, P. A. JADHAV, G. J. ANNIE, D. GOYAL, B. M. HARDAS AND P. MANGE : Natural language processing for drug information extraction : Advancing knowledge discovery in biomedical literature	383–393
S. RAUT, S. BHURA, J. KHUSHALANI, H. KIM, N. RAMANI, R. BAJAJ AND D. JESWANI : Revolutionizing construction engineering education : A virtual reality approach for enhanced training and optimization	395–403
N. R. JADHAV, S. BHUTADA, S. R. SAGAVKAR, R. PAWAR, A. B. KANWADE AND P. MANGE : AI-driven pharmaceutical manufacturing : Revolutionizing quality control and process optimization	405–416
A. S. SHETE, S. BHUTADA, M. B. PATIL, P. H. SEN, N. JAIN AND P. KHOBRAGADE : Blockchain technology in pharmaceutical supply chain : Ensuring transparency, traceability, and security	417–428
B. K. PANDA, P. B. NIRANJANE, D. P. MALI, P. A. BAINALWAR, U. B. AHER AND S. BHATTACHARYA : Pharmacovigilance in the digital era : A machine learning approach for early detection of adverse drug reactions	429–440

L. M. S. AKOOSH, F. SIDDIQUI, S. ZAFAR, S. NAAZ AND M. A. ALAM : An experiment-based investigation into machine learning for predicting coronary heart disease	441–453
M. BANDAY, S. ZAFAR, P. AGARWAL AND M. A. ALAM : Diabetes prediction using machine learning classifiers with oversampling and feature augmentation	455–464
P. R. NAIDU, P. GITE, V. DEKA, K. D. V. PRASAD, V. D. GOWDA AND M. RAHMAN : Mathematical enhancement of unsupervised machine learning algorithms for optimal lifeline donor knowledge extraction	465–477
D. SHARMA AND R. GOYAL : A review on unveiling the impact of government policies on Rajasthan's startup ecosystem	479–488
A. K. TIWARI AND S. YADAV : Algorithmic model for cloud performance optimization using connection pooling technique	489–499
DIBYANSHU AND R. K. S. RAJPUT : Exploring agricultural image data through deep learning for visual information analysis : A study on Cabbage (<i>Brassica Oleracea</i> var. <i>Capitata</i>) farming	501–513

Number 3, April

E. G. KOÇYİĞİT AND C. KADILAR : Modified exponential ratio estimator for ranked set sampling in the presence of tie information and application on COVID-19 real data	515–534
E.B. TWUM, E. ASA, B. AWUKU AND A. ESSEGBEY : Investigating trends in traffic count data utilizing exploratory data analysis and regression analysis	535–568
D. RAHARDJA : Statistical time-series forecast error and bias assessment using hold-out samples and a single benchmark (data-reduction) scoring metric	569–578
R. SIEW : An instance of negative variance-like 'components' in optics by way of applying multivariable calculus to a statistical problem	579–587
S. SINGH, D. S. HOODA AND S. C. MALIK : Estimation of missing data in intuitionistic fuzzy soft matrix (IFSM) with application in MCDM	589–603
B. SAYLAN AND S. CINAROGLU : Opinion mining and machine learning analysis : What emotions twitter data tell us about telemedicine?	605–633

C. H. CHEN AND T. H. LEE : Joint determination of quality investment and tolerance under the sampling inspection plan with quality protection	635–643
A. M. EESA, M. K. L. ALHASNAWI AND Z. F. HAMZA : Using kernel functions to estimate the probability density function for segmentation images	645–654
S. A. ABDEL-ZAHRA AND A. H. S. AL-MOUEL : Restricted estimators of repeated measurements model for unbalanced data	655–661
H. I. MUSTAFA AND A. S. AL-MOUEL : Reduced bias estimation of variance for repeated measurements model	663–671
C. H. CHEN AND T. H. LEE : Economic manufacturing quantity model with quality investment	673–680
D. K. KATARIYA AND K. T. SHUKLA : Retailer's optimal pricing and replenishment policy for new product and buy back policy for used product with price and time dependent demand and shortages	681–701
S. KUMAR, A. PATHAK, M. KUMAR AND S. K. SINGH : Bayesian estimation : Number of species from Poisson mixed exponential-gamma distribution using objective priors	703–720
V. D. GOWDA, V. N. PRASAD, K. D. V. PRASAD, K. S. YOGI, M. S. BORAIHAH AND M. RAHMAN : Mathematical framework for real-time data processing in edge computing : Context-aware priority scheduling analysis	721–732

Number 4, May

M. A. ISLAM, D. J. MOLOY AND M. S. A. SALAN : Developing a mixture decision tree (MDT) algorithm with k-means clustering to improve classification accuracy	733–749
A. S. AYODEJI, A. V. OLADUGBA AND O. C. FABIAN : Regression-type ratio estimators of population means using calibration weights	751–768
D. RAHARDJA : Advantages and disadvantages comparison of time-series forecast computing via microsoft excel and three different SAS products	769–784
L. D. R. REIS : The unit log-normal distribution : An alternative for beta and Kumaraswamy distributions	785–796
M. K. CHAUDHARY AND N. BHARDWAJ : Calibration-based approach in estimation of population mean under stratified two-phase sampling scheme	797–813

- Y. P. TENG AND L. Z. LAN : Research on influencing factors of rural inclusive finance - A case study of Fujian in PRC 815–834

Number 5, July

- E. S. ILIKKAN AND E. YILDIRIM : The Type I Half Logistic-Burr XII lifetime distribution : Properties and application to survival data 835–852
- W. SENGWENI, B. OLUYEDE AND K. RANNOA : The exponentiated Half-Logistic-Type II Topp-Leone-G family of distribution with applications 853–876
- S. M. EL-GAYAR, A. A. AHMED AND M. A. MAHMOUD : Robust M-estimation for linear regression models : Adaptive aspect 877–910
- M. MAHDY, B. AHMED AND M. ASLAM : Testing lifetime of the product using new distribution in group acceptance sampling plan 911–929
- C. T. ARTIKIS AND P. T. ARTIKIS : Bernoulli selection processes and power contractions in strategic operations 931–941
- A. ALMANSOUR : Comparing the accuracy of support vector machine and the Naïve Bayes algorithm : Twitter sentiment analysis during the COVID-19 pandemic 943–958
- T. KATSEKPOR AND K. DOKU-AMPONSAH : Large deviations : Estimating the number of positive individuals in a Bernoulli sample through sample pooling 959–969
- M. A. R. AL-BOJMAL AND R. IMANY-NABIYYI : Using Bayesian and classical methods to estimation parameter for inverse Pareto distribution under randomly censored data 971–983
- W. J. AL-OBAYDI AND R. IMANY-NABIYYI : Using fuzzy statistical models to estimate upper and lower bounds of Gini coefficient 985–995
- K. S. PAWAR AND B. J. MOHITE : Performance analysis of UKM-IDS20 dataset on machine learning algorithms 997–1008
- N. KAMBLE, A. PHATAK, A. JOSHI, R. ADHAO AND V. PACHGHARE : Exploring the efficiency : A comprehensive analysis of machine learning algorithms in WEKA software 1009–1019

V. S. BILASKAR, S. V. ARADHYE, S. S. SHINDE, D. D. KSHIRSAGAR AND P. R. NIMBALKAR : An intrusion detection system for industrial IoT using chi-square feature selection	1021–1031
M. SOHAIL AND K. THAKRE : Managing token limitations with RoBERTa-large for enhanced plagiarism detection	1033–1043
R. C. POONIA, A. K. J. SAUDAGAR, P. PRABU AND M. B. KHAN : Enhancing cognitive accessibility and social interaction in special education through AMLE	1045–1063
R. C. POONIA, A. K. J. SAUDAGAR AND V. BHATNAGAR : Analyzing forecasting capabilities of GARCH models for stock prices in stochastic volatility contexts	1065–1084
V. BHATNAGAR, A. K. J. SAUDAGAR AND R. C. POONIA : Implementing LSTM models for forecasting gold prices and analyzing volatility	1085–1094

Number 6, September

M. SAHOO AND S. CHAKRAVERTY : Possibilistic linear and quadratic regression analysis for fuzzy random data and application	1095–1115
N. YAACOB AND H. NASIR : A time-delay model for the population dynamics of diabetes during pregnancy	1117–1137
K. K. AJONGBA, S. NASIRU, A. A. A. KOBILLA AND A. G. ABUBAKARI : Error function Burr XII distribution : Quantile regression, classical and Bayesian applications	1139–1168
X. CHEN AND C. K. CHEN : An initial exploration of market dynamics and financial investment strategies in the cultural industries	1169–1184
S. WADEHRA, J. VARANASI AND A. ANAND : Prediction of solar energy forecasting by using linear and logistic regression : A review and geographical comparative analysis in Indian context	1185–1198
A. B. BOAKYE, S. NASIRU AND S. WIREDU : New family of distributions based on the unit modified Burr III distribution	1199–1220
M. PARSAMANESH AND M. ABUKHALED : Stochastic modeling of spreading an infection with standard incidence rate	1221–1241

Number 7, October

B. MAKUBATE, F. CHIPEPA, B. OLUYEDE AND G. MOAGI : The Marshall-Olkin-exponentiated half logistic-G family of distributions : Model, properties and applications	1243–1259
M. S. KOTB AND Y. ABDEL-ATY : Bayesian prediction intervals for the exponential-type distributions under multiply Type-II censoring data	1261–1275
L. ISMAIL, H. DJELLOUT AND C. CHAUVIÈRE : Global sensitivity analysis in the SIHR epidemiological model with application to COVID-19	1277–1299
R. KAZEMI AND S. Z. MEHREYAN : Designs and comparison of simple stress accelerated life tests for Weibull-half-logistic distribution based on progressive Type I censoring and a cost constraint	1301–1315
G. C. IBEH AND J. I. MBEGBU : Weibull-generalized inverted exponential {log-logistic} distribution : Features and practicalities	1317–1333
H. A. NOUGHABI AND M. S. NOUGHABI : On estimating the variance of the sample median	1335–1342
C. H. CHEN AND T. H. LEE : Quality investment and tolerance setting under the product inspection	1343–1356
M. ASLAM, A. SAGHIR AND M. S. F. NEZHAD : A review on control charts based on different sampling schemes	1357–1366
X. CHEN : The Petersburg paradox of the gambling industry	1367–1380
L. Y. XIN, C. W. CHEONG, G. T. A. HUI AND L. MIN : Gold market risk evaluations using GARCH incorporate with machine learning	1381–1391
M. MISHRA, B. B. KHARE AND S. SINGH : Two classes of two-phase sampling estimators for the ratio of two population means using stratified random sampling in the presence of non-response	1393–1412
P. SINGH AND R. SINGH : Improved generalized exponential estimators in simple random sampling without replacement using some transformations	1413–1431
O. D. ADUBISI, A. ABDULKADIR AND H. CHIROMA : The half-logistic (Type-I)-skew-t model : Comparison of different estimation approaches using Monte Carlo simulations	1433–1451

- J. YUHAN, Y. DERU, F. SUZE, C. W. CHEONG AND L. MIN : The impact of COVID-19 on value-at-risk estimations for US and China stock markets 1453–1472
- S. NANGA, S. NASIRU AND J. DIOGBAN : Secant Topp-Leone family of distributions : Properties, regression and applications 1473–1497

Number 8, November

- B. E. OCRAN, R. MINKAH AND K. D. AMPONSAH : A reduced-bias weighted least squares estimation of the extreme value index 1499–1523
- T. HE AND N. LIA : Age-structured model with varied contact patterns and vaccination of COVID-19 in Liaoning Province, China 1525–1539
- M. K. HASSAN : Estimation of three entropies for Dagum distribution using Type-II censored data 1541–1556
- F. SAĞLAM, T. ŞANLI AND M. A. CENGİZ : ShinySurv : A survival analysis and Shiny web application 1557–1575
- R. S. TEPPAWAR, R. N. INGLE AND R. A. MUNESHWAR : Analysis of system of fractional partial differential equations using Laplace reduced differential transform with decomposition method 1577–1594
- R. R. RAHRIG : ANOVA F-test and Kruskal-Wallis test performance comparison under varying distributions, variance heterogeneity, sample sizes, and noncentrality structures 1595–1613
- J. P. JOSEPH : The role of emotional regulations and risk appetite on investment decision 1615–1634
- X. CHEN AND C. K. CHEN : Hollywood's enchantment and cursed underbelly 1635–1656
- M. SHIROZHAN, A. S. NIK, A. ASGHARZADEH, H. S. BAKOUCH AND M. MOHAMMADPOUR : A max-autoregressive process based on Marshall-Olkin new Pareto-type distribution 1657–1681
- C. H. CHEN AND T. H. LEE : Process variance setting and quality investment selection for modified traditional inventory model 1683–1689
- A. S. MEZHER AND W. S. IBRAHIM : Using the Bayesian method to estimate the exponential survival regression model for stomach cancer patients in Iraq 1691–1700

R. Q. ABDULKADHIM, H. S. ABDULLAH AND M. J. HADI : Improving cryptocurrency price prediction through advanced LSTM-based deep learning techniques	1701–1712
M. B. KHAN AND A. K. J. SAUDAGAR : Comparative analysis of medical knowledge and inferential capabilities of modern LLMs	1713–1722
P. SHARMA, D. SHARMA, R. V. ANAND, A. K. UTTAM AND G. M. UPADHYAY : Optimizing sustainable urban transformation : Harnessing IoT integration for smart cities	1723–1732
M. B. KHAN AND A. K. J. SAUDAGAR : Designing a structured approach for consistency verification in AI systems for heartbeat disorder-related conversations	1733–1741
Index of Volume 27 (2024)	1743–1752
